True / False (10 marks)

Answer True or False

6. True or False: The doubly labelled water technique has limitations, including not identifying mis-reporting of low energy content foods.

7. True or False: Self-induced vomiting is the most common behavior used by individuals with Bulimia Nervosa to compensate for binge eating.

8. True or False: Lactobacilli are the main cause of dental caries in the oral cavity.

9. True or False: Demineralisation of tooth enamel typically occurs at a pH level of around 5.5.

10. True or False: The daily amount of protein oxidized in the body can be determined from total urinary nitrogen excretion alone.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the potential risks and benefits of consuming food supplements, particularly focusing on Vitamin C. How can excessive intake impact health, and what are the recommended daily requirements?

12. Discuss the process of water transport between the intestinal lumen and the bloodstream during digestion, focusing on how it helps regulate luminal osmolality.
