

Multiple Choice (10 marks)

1. What part do "heuristics" play in the processing of sensory information?
 - (a) Heuristics are tools for enhancing sensory acuity
 - (b) Heuristics are memory storage systems
 - (c) Heuristics are neurological pathways for sensory processing
 - (d) Heuristics are sensory output systems for motor responses
 - (e) Heuristics are the primary means of sensory data storage
2. Discuss the two types of behavior that can result from an avoidance-avoidance conflict.
 - (a) Indecision and escalation
 - (b) Aggression and passive resistance
 - (c) Procrastination and denial
 - (d) Displacement and rationalization
 - (e) Overcompensation and withdrawal
3. According to Irvin Yalom, _____ in group therapy is the analogue of the therapist-client relationship in individual therapy.
 - (a) identification
 - (b) alliance
 - (c) interpersonal learning
 - (d) disclosure
 - (e) catharsis
4. Numerous factor-analytic studies have been performed on tests of motor function (e.g., Purdue Pegboard). In general, these studies have revealed that
 - (a) most motor functions are determined by age and gender
 - (b) motor functions are independent and do not correlate
 - (c) motor functions correlate moderately and form 3 to 4 factors
 - (d) most motor functions correlate highly and form a single factor
 - (e) most motor functions correlate highly and form 2 single factor
5. How is incoming sensory verbal information abstracted in terms of classification?
 - (a) The nervous system classifies information based on emotional response
 - (b) The nervous system classifies information over a period of time

- (c) The nervous system classifies information randomly
- (d) The nervous system classifies information based on the type of senses
- (e) The nervous system classifies information based on previous experiences only

True / False (10 marks)

Answer True or False

- 6. True or False: Education is inherently unbiased, while propaganda is always characterized by its reliance on emotional appeals.
- 7. True or False: Medication is the only effective treatment modality for addressing depression in behavioral therapy.
- 8. True or False: In an approach-approach conflict, choosing one option typically magnifies the attractiveness of the alternative outcome.
- 9. True or False: Dysphagia is a communication disorder that primarily affects language comprehension and verbal expression.
- 10. True or False: People with high emotional stability tend to be more susceptible to hypnosis than those with high openness.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the implications of variance in the ages of a couple's six children (ages 6, 8, 10, 12, 14, 16) on their developmental stages, and analyze how this may affect parenting strategies.
- 12. Discuss the key steps involved in systematic desensitization therapy and analyze why the use of hypnosis for relaxation may not align with its core principles.
