 - (c) Beck's cognitive-behavioral therapy.
 - (d) Perls's Gestalt therapy.
 - (e) Erikson's stages of psychosocial development
4. You are given four lists of words to learn: 1, 2, 3, and 4. You must learn list 1, then list 2, etc. Which list(s) would cause proactive interference for remembering list 2?
 - (a) list 4 only
 - (b) list 1 only
 - (c) lists 2 and 3 only
 - (d) lists 1, 3 and 4 only
 - (e) lists 1 and 4 only
5. Neural transmission is often described as an electrochemical process. Which of the following is most directly involved in the electrical aspect?

- (a) cell body
- (b) myelin
- (c) synaptic vesicles
- (d) glial cells
- (e) terminal buttons

True / False (10 marks)

Answer True or False

6. True or False: Hersey and Blanchard's model suggests a participative style is best for subordinates with low ability and high motivation.
7. True or False: In the context of sexual harassment, 'quid pro quo' involves overt (explicit) sexual conduct in exchange for job-related benefits.
8. True or False: Converting total errors on a test to percent correct represents an exponential transformation of the data.
9. True or False: Kohlberg's cognitive-developmental theory identifies gender identity as the initial stage of gender-role acquisition in children.
10. True or False: The classic aging pattern involves declines in all subtests except the Vocabulary subtest of the Wechsler Adult Intelligence Scale-Revised.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the role of temporal contiguity in classical and operant conditioning, analyzing how it influences learning and behavior modification in both paradigms.
12. Discuss how Campbell and Stanley's perspective on time-series design highlights the role of simultaneous events in explaining fluctuations in outcome slopes. Provide examples to support your analysis.
