

Multiple Choice (10 marks)

1. Garcia and Koelling's research regarding learned aversions established that which of the following UCS and CS pairs are the most powerful and learned most quickly?
 - (a) pleasure and a visual stimulus
 - (b) thirst and a particular color
 - (c) movement and shock
 - (d) punishments and rewards
 - (e) anger and a specific musical note
2. Find the variance of the sample of observations 2, 5, 7, 9, 12.
 - (a) 10.2
 - (b) 10.6
 - (c) 12.4
 - (d) 9.8
 - (e) 7.4
3. What are the four tenets of analytical psychotherapy according to Jung?
 - (a) Id, ego, superego, libido
 - (b) Self-regulating psyche, the unconscious, family, stages of self-improvement
 - (c) Self-regulating psyche, archetypes, the unconscious, stages of self-improvement
 - (d) Self-regulating psyche, the unconscious, family, therapist-patient relationship
 - (e) Archetypes, the unconscious, therapist-patient relationship, stages of self-improvement
4. In a two-variable situation in which one variable is dichotomous and the other is interval and continuous, which of the following correlation procedures is most appropriate
 - (a) Kendal's tau
 - (b) Biserial correlation
 - (c) Cramer's V
 - (d) Eta
 - (e) Goodman and Kruskal's gamma
5. How does the study of stereotyping relate to attribution theory?
 - (a) Stereotyping and attribution theory are equivalent concepts.
 - (b) Attribution theory contradicts the principles of stereotyping.

- (c) Attribution theory rests on a specialized type of stereotyping.
- (d) Attribution theory has nothing to do with stereotyping.
- (e) Stereotyping is a fundamental aspect of attribution theory.

True / False (10 marks)

Answer True or False

- 6. True or False: Statistical nonsignificance under low power is the least informative outcome of an experiment, as it may miss true effects.
- 7. True or False: Stern's 'genetic blueprint' hypothesis posits that an individual's genetic makeup fundamentally shapes their developmental outcomes.
- 8. True or False: Acquisition trials involve a neutral stimulus that begins to elicit a conditioned response in anticipation of an unconditioned stimulus.
- 9. True or False: The occipital lobe is the least developed area of the brain at birth, playing a crucial role in visual processing from the outset.
- 10. True or False: Physical deviation has no significant psychological impact on adolescents' overall development and self-esteem.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the advantages of using a variable ratio schedule of reinforcement over a fixed ratio schedule, particularly in terms of efficiency and behavior modification outcomes.
- 12. Discuss the nature of psychosomatic disorders, including their characteristics and underlying mechanisms, and analyze the therapeutic approaches commonly employed to treat them.
