

Multiple Choice (10 marks)

1. Answering multiple-choice questions is often easier than answering fill-in or completion questions, because multiple choice questions
 - (a) are definitional rather than conceptual
 - (b) check memorization rather than critical thinking
 - (c) encourage rote learning rather than comprehension
 - (d) require less time to answer
 - (e) enhance retention of information
2. Providing education and job training to adolescents and young adults who have recently been released from a drug treatment program is an example of:
 - (a) secondary intervention.
 - (b) quaternary prevention.
 - (c) secondary prevention.
 - (d) psychological intervention.
 - (e) advanced prevention.
3. Which schedule of reinforcement is followed by Soledad, who answers every e-mail message her friend sends?
 - (a) negative reinforcement
 - (b) continuous
 - (c) positive reinforcement
 - (d) extinction
 - (e) variable interval
4. ""Vicarious liability"" is most likely to be a concern when a psychologist is acting in the role of:
 - (a) consultant.
 - (b) supervisor.
 - (c) faculty member.
 - (d) researcher.
 - (e) clinical director.
5. Antonia has a cat. The first time she sees a rabbit, she calls it a cat. Her mistake is due to the process of:
 - (a) association.

- (b) generalization.
- (c) recognition.
- (d) classification.
- (e) interpretation.

True / False (10 marks)

Answer True or False

- 6. True or False: In forced compliance situations, belief change is more significant when individuals
- 7. True or False: The Wechsler Adult Intelligence Scale was the first standardized measure of asse
- 8. True or False: The life of an alcoholic typically progresses through the onset phase, abuse phase
- 9. True or False: Bandura's social learning theory posits that children's misbehaviors are influenced
- 10. True or False: Systematic desensitization involves confronting the actual feared object or situatio

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the differences between motor (enactive) codes and visual or verbal codes in memory representation, providing examples to illustrate your analysis.
- 12. Discuss the significance of the median in understanding data distributions, using the set of numbers 5, 8, 12, 3, and 9 to illustrate your analysis.
