

Multiple Choice

1. **Answer:** A

Options: A) By overwriting the return address to point to the location of that code; B) By writing directly to the instruction pointer register the address of the code; C) By writing directly to %eax the address of the code; D) By changing the name of the running executable, stored on the stack

Note: Correct option: A - By overwriting the return address to point to the location of that code

2. **Answer:** A

Options: A) Silk Road; B) Cotton Road; C) Dark Road; D) Drug Road

Note: Correct option: A - Silk Road

3. **Answer:** D

Options: A) Restrict what operations/data the user can access; B) Determine if the user is an attacker; C) Flag the user if he/she misbehaves; D) Determine who the user is

Note: Correct option: D - Determine who the user is

4. **Answer:** D

Options: A) Mishandling of undefined, poorly defined variables; B) The Vulnerability that allows "fingerprinting" & other enumeration of host information; C) Overloading of transport-layer mechanisms; D) Unauthorized network access

Note: Correct option: D - Unauthorized network access

5. **Answer:** B

Options: A) Port, network, and services; B) Network, vulnerability, and port; C) Passive, active, and interactive; D) Server, client, and network

Note: Correct option: B - Network, vulnerability, and port

True / False

6. **Answer:** False

Options: A) True; B) False

Note: LLM-generated false statement. Correct answer: 'UNIX'.

7. **Answer:** False

Options: A) True; B) False

Note: LLM-generated false statement. Correct answer: 'boundary checks'.

8. **Answer:** True

Options: A) True; B) False

Note: LLM-generated true statement based on MCQ.

9. **Answer:** False

Options: A) True; B) False

Note: LLM-generated false statement. Correct answer: 'Network or transport layer'.

10. **Answer:** True

Options: A) True; B) False

Note: LLM-generated true statement based on MCQ.

Long Form Response

11. **Answer:** `def diff_consecutivenums(nums): | return result`

Note: Students should provide a detailed explanation referencing algorithm steps.

12. **Answer:** `def smallest_Divisor(n): | return 2; | return i; | return n;`

Note: Students should provide a detailed explanation referencing algorithm steps.
