

Multiple Choice

1. **Answer:** D

Options: A) conversion of fats to fatty acids and glycerol; B) conversion of proteins to amino acids; C) conversion of starch to simple sugars; D) conversion of pyruvic acid to acetyl CoA

Note: Correct option: D - conversion of pyruvic acid to acetyl CoA

2. **Answer:** A

Options: A) are more abundant than most other species in their communities; B) tend to reduce diversity by eliminating food resources for other species; C) are the largest species in their communities; D) are the most aggressive species in their communities; E) are the only species capable of reproduction

Note: Correct option: A - are more abundant than most other species in their communities

3. **Answer:** C

Options: A) carbon atoms; B) oxygen atoms; C) nitrogen atoms; D) hydrogen atoms

Note: Correct option: C - nitrogen atoms

4. **Answer:** D

Options: A) Epidermal cell; B) Stomatal guard cell; C) Root cap cell; D) Xylem vessel member; E) Phloem sieve tube member

Note: Correct option: D - Xylem vessel member

5. **Answer:** A

Options: A) 1/53; B) 3/52; C) 2/51; D) 2/52; E) 4/52

Note: Correct option: A - 1/53

True / False

6. **Answer:** False

Options: A) True; B) False

Note: The results of this study suggest that normothermic CPB does not prevent the development of the "euthyroid sick syndrome" during and after CPB. Despite these changes in thyroid function, most patients in both groups had a normal postoperative recovery.

7. **Answer:** True

Options: A) True; B) False

Note: While ultrasound examination is inexpensive and easily done, it is not accurate enough for staging small penile cancers located at the glans penis. However, for larger

tumors ultrasound can be a useful addition to physical examination by delineating reliably the anatomic relations of the tumor to structures such as the tunica albuginea, corpus cavernosum, and urethra.

8. **Answer:** True

Options: A) True; B) False

Note: Age $\leq$ 45 years, DFI>1 year, and the combined therapy were good prognostic factors for NPC patients with lung metastasis(es) alone. The combination of local therapy and the basic chemotherapy should be considered for these patients with DFI>1 year.

9. **Answer:** False

Options: A) True; B) False

Note: Although BD is correlated with GCS at presentation and RTS, it is not a reliable prognostic marker for outcome and mortality in patients with isolated TBI.

10. **Answer:** True

Options: A) True; B) False

Note: The preliminary results of this study suggest that this approach may be helpful as an independent tumor staging factor. It is also worth noting that part of the staging process could also be based on features describing the immune cells in the peripheral blood.

Long Form Response

11. **Answer:** Innate immunity, also known as the adaptive immune response, relies on circulating phagocytes engulfing foreign substances.. Explain why this is the correct answer and provide supporting evidence. Reference key facts or concepts that support this choice.

Note: Long-form derived from MCQ; award credit for stating the correct idea and giving supporting reasoning.

12. **Answer:** Bones help in digestion. Explain why this is the correct answer and provide supporting evidence. Reference key facts or concepts that support this choice.

Note: Long-form derived from MCQ; award credit for stating the correct idea and giving supporting reasoning.
