

## Multiple Choice

1. **Answer:** B

*Options:* A) The neurilemma sheath absorbs toxins at the injury site to facilitate regeneration.; B) The neurilemma sheath provides a channel for the axon to grow back to its former position.; C) The neurilemma sheath fuses severed axon ends together.; D) The neurilemma sheath repels inhibitory molecules that prevent nerve growth.; E) The neurilemma sheath acts as a source of neural stem cells for regeneration.

*Note:* Correct option: B - The neurilemma sheath provides a channel for the axon to grow back to its former position.

2. **Answer:** C

*Options:* A) Birds are called a society because each bird takes a turn leading the flock.; B) Birds in a flock are unrelated; C) A flock of birds can be considered an elementary form of society called a motion group.; D) The collective intelligence of a flock is referred to as a society.; E) Birds form a society to perform individual activities

*Note:* Correct option: C - A flock of birds can be considered an elementary form of society called a motion group.

3. **Answer:** C

*Options:* A) The suspensor is derived from the basal cell.; B) Cotyledons are derived from the apical cell.; C) Shoot apical meristem formation occurs after seed formation.; D) Precursors of all three plant tissue systems are formed during embryogenesis.

*Note:* Correct option: C - Shoot apical meristem formation occurs after seed formation.

4. **Answer:** C

*Options:* A) The organism is extinct in the wild and cannot be harvested for vaccine production; B) The organism that causes smallpox is too costly to use in vaccine production; C) The use of the actual virulent variola virus may be dangerous if too much is administered; D) Smallpox virus is confined to research laboratories; E) There is no specific treatment for smallpox

*Note:* Correct option: C - The use of the actual virulent variola virus may be dangerous if too much is administered

5. **Answer:** A

*Options:* A) The gills of a fish and the lungs of a human; B) The leaves of an oak tree and the spines of a cactus; C) The eyes of a human and the eyes of a squid; D) The roots of a tree and the legs of an animal; E) The presence of a notochord in all chordate embryos

*Note:* Correct option: A - The gills of a fish and the lungs of a human

## True / False

6. **Answer:** False

*Options:* A) True; B) False

*Note:* We found no evidence to support the use of AG routinely in IBS patients. Improvement of clinical response at 4-week follow-up may suggest a long-term effect of unknown mechanism, but could also be attributed to non-responder drop out. Gastrointestinal (GI) side effects may be a coincidence in this study, but irritation of GI tract by AG administration cannot be excluded.

7. **Answer:** False

*Options:* A) True; B) False

*Note:* Mothers' BMI highly correlate with children's BMI-z-scores. The degree of child's obesity increases mothers' concern and food restriction behavior. While mothers of obese children have a high prevalence of obesity, maternal obesity was found to have no significant influence on feeding behavior of obese school children.

8. **Answer:** True

*Options:* A) True; B) False

*Note:* The present survey showed a weak relationship between serum ACE and the frequency of SH, the clinical relevance of which is unclear. This limits the proposed role for serum ACE as an index of risk for SH.

9. **Answer:** True

*Options:* A) True; B) False

*Note:* General practitioners should consider using patients' first names more often, particularly with younger patients.

10. **Answer:** True

*Options:* A) True; B) False

*Note:* Our results give first evidence that lowered beta E during alcohol withdrawal may contribute to anxiety as a common disturbance during this state.

## Long Form Response

11. **Answer:** They exclusively evolved into modern reptiles without any other descendants. Explain why this is the correct answer and provide supporting evidence. Reference key facts or concepts that support this choice.

*Note:* Long-form derived from MCQ; award credit for stating the correct idea and giving supporting reasoning.

12. **Answer:** Vegetation-formation mapping does provide a basis for climatic mapping. Explain why this is the correct answer and provide supporting evidence. Reference key facts or concepts that support this choice.

*Note:* Long-form derived from MCQ; award credit for stating the correct idea and giving supporting reasoning.
