

Multiple Choice

1. **Answer:** C
Options: A) Haunted web; B) World Wide Web; C) Dark web; D) Surface web
Note: Correct option: C - Dark web
2. **Answer:** D
Options: A) Mishandling of undefined, poorly defined variables; B) The Vulnerability that allows "fingerprinting" & other enumeration of host information; C) Overloading of transport-layer mechanisms; D) Unauthorized network access
Note: Correct option: D - Unauthorized network access
3. **Answer:** C
Options: A) It is used to call procedures with addresses that are farther than 2^{16} bytes away.; B) It cannot return a value.; C) It cannot pass parameters by reference.; D) It cannot call procedures implemented in a different language.
Note: Correct option: C - It cannot pass parameters by reference.
4. **Answer:** A
Options: A) n ; B) $n + 1$; C) $n + 2$; D) $2n$
Note: Correct option: A - n
5. **Answer:** D
Options: A) Condition codes set by every instruction; B) Variable-length encoding of instructions; C) Instructions requiring widely varying numbers of cycles to execute; D) Several different classes (sets) of registers
Note: Correct option: D - Several different classes (sets) of registers

True / False

6. **Answer:** True
Options: A) True; B) False
Note: LLM-generated true statement based on MCQ.
7. **Answer:** False
Options: A) True; B) False
Note: LLM-generated false statement. Correct answer: 'Key exchange'.
8. **Answer:** False
Options: A) True; B) False
Note: LLM-generated false statement. Correct answer: 'accepted by some Turing machine, but by no pushdown automaton'.

9. **Answer:** True

Options: A) True; B) False

Note: LLM-generated true statement based on MCQ.

10. **Answer:** True

Options: A) True; B) False

Note: LLM-generated true statement based on MCQ.

Long Form Response

11. **Answer:** `def harmonic_sum(n): | return 1 | return 1 / n + (harmonic_sum(n - 1))`

Note: Students should provide a detailed explanation referencing algorithm steps.

12. **Answer:** `def factorial(start,end): | return res | def sum_of_square(n): | return int(factorial(n + 1, 2 * n) / factorial(1, n))`

Note: Students should provide a detailed explanation referencing algorithm steps.
