

Multiple Choice (10 marks)

1. _____ is a popular tool used for network analysis in multiprotocol diverse network.
 - (a) Snort
 - (b) SuperScan
 - (c) Burp Suit
 - (d) EtterPeak
2. In MD-5 the length of the message digest is
 - (a) 160
 - (b) 128
 - (c) 64
 - (d) 54
3. In Message Confidentiality, the transmitted message must make sense to only intended
 - (a) Receiver
 - (b) Sender
 - (c) Modulator
 - (d) Translator
4. SHA-1 has a message digest of
 - (a) 160 bits
 - (b) 512 bits
 - (c) 628 bits
 - (d) 820 bits
5. The _____ was a huge marketplace of Dark Web specifically famous for selling of illegal drugs & narcotics as well as you can find a wide range of other goods for sale.
 - (a) Silk Road
 - (b) Cotton Road
 - (c) Dark Road
 - (d) Drug Road

True / False (10 marks)

Answer True or False

6. True or False: When the STP solver times out, EXE assumes the query is satisfiable and continues executing the path.
7. True or False: The types of scanning include network, vulnerability, and port scanning, which are essential for security assessments.
8. True or False: Exploitation of the Heartbleed bug enables the execution of a format string attack on the targeted server.
9. True or False: The one-time pad key can be computed as $k = m \text{ xor } c$, where m is the original message and c is its ciphertext.
10. True or False: Penetration testing is primarily focused on evaluating individual libraries or components for security vulnerabilities.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Write a function to count number of lists in a given list of lists and square the count.
12. Write a python function to print negative numbers in a list.
