

Multiple Choice (10 marks)

1. Cholesterol and fatty acids absorbed from the intestinal lumen are packaged into which types of lipoproteins and secreted from the enterocytes into the lymph?
 - (a) Chylomicrons only
 - (b) LDL only
 - (c) VLDL and LDL
 - (d) Chylomicrons and HDL
 - (e) VLDL and HDL
2. Which of the following foramina pierce the sphenoid bone?
 - (a) The foramen ovale
 - (b) The foramen ovale, rotundum and spinosum
 - (c) The foramen ovale, foramen spinosum and foramen lacerum
 - (d) The foramen ovale and rotundum
 - (e) The foramen ovale, rotundum, spinosum and superior orbital fissure
3. Which of the following describes the cluster of blood capillaries found in each nephron in the kidney?
 - (a) Afferent arteriole
 - (b) Glomerulus
 - (c) Renal medulla
 - (d) Proximal convoluted tubule
 - (e) Efferent arteriole
4. Which of the following releases most energy when completely oxidised in the body?
 - (a) One gram of glycerol
 - (b) One gram of lactose
 - (c) One gram of fructose
 - (d) One gram of palmitic acid
 - (e) One gram of cellulose
5. Which of the following lipoproteins is produced via the exogenous lipoprotein pathway?
 - (a) Chylomicrons
 - (b) Medium density lipoproteins

- (c) Micro lipoproteins
- (d) Intermediate density lipoproteins
- (e) Low density lipoproteins

True / False (10 marks)

Answer True or False

- 6. True or False: Riboflavin serves as a coenzyme in reduction reactions that are essential for fatty acid synthesis.
- 7. True or False: Regulation of body temperature is the most important function of the gastrointestinal tract after eating.
- 8. True or False: Most pandemics have arisen from influenza viruses originating in wild birds.
- 9. True or False: The complete resynthesis of phosphocreatine after very high intensity exercise normally takes about 4 minutes.
- 10. True or False: According to medical guidelines from 2020, one should attempt to cannulate a patient only once before referring to a senior colleague.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the implications of consuming vitamin C in excess of the recommended daily requirement, including potential health benefits and risks, and compare these to other common food supplements.
- 12. Discuss the prevalence of respiratory diseases among vegetarians compared to non-vegetarians, analyzing potential factors that contribute to these differences in health outcomes.
