True / False (10 marks)

Answer True or False

6. True or False: Social support positively influences health and well-being when it is perceived as supportive by the recipient.
7. True or False: The aging brain is more efficient at accessing long-term memory compared to younger adults, facilitating easier memory retrieval.
8. True or False: Alzheimer's disease has significantly increased as a cause of death over the past decade compared to other health conditions.
9. True or False: Factor VIII is only distributed to hospitals that adhere to rigorous infection control protocols, ensuring zero risk of HIV transmission.
10. True or False: Leucine is an amino acid that cannot serve as a substrate for gluconeogenesis.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the laryngoscopic findings in vocal fold examination post-recurrent laryngeal nerve damage, focusing on muscle activity and its implications for vocal fold positioning.
12. Discuss the impact of environmental factors, particularly radiation exposure, on bone density loss. What mechanisms underlie this association, and how can it inform public health strategies?
