

Multiple Choice (10 marks)

1. How is iron transported in the circulation from the intestine to the sites of metabolism in the body?
 - (a) As simple Fe 2+ in the serum
 - (b) Bound to albumin
 - (c) Bound to ferritin
 - (d) Bound to transferrin
2. How much dietary protein should athletes consume daily?
 - (a) <0.8 g protein per kg bodyweight per day
 - (b) 0.8-1.2 g protein per kg bodyweight per day
 - (c) 1.2-1.7 g protein per kg bodyweight per day
 - (d) >2.0 g protein per kg bodyweight per day
3. Which of the following statements is not true?
 - (a) Docosahexaenoic acid can be synthesised from linolenic acid in vegans
 - (b) Docosahexaenoic acid is absent from vegan diets
 - (c) Lack of docosahexaenoic acid in vegans causes visual and cognitive impairment
 - (d) Microalgae can be used to synthesise docosahexaenoic acid
4. Deficiency of which of the following vitamins results in megaloblastic anaemia?
 - (a) Folate
 - (b) Niacin
 - (c) Riboflavin
 - (d) Vitamin B 6
5. Ulcerative Colitis
 - (a) Carries a risk of colonic cancer
 - (b) Can be treated with a LOFFLEX diet
 - (c) Can be caused by small intestinal bacterial overgrowth
 - (d) Can be caused by milk intolerance

True / False (10 marks)

Answer True or False

6. True or False: The prevalence of alcoholic myopathy in alcoholics is estimated to be between 40 to 60%.
7. True or False: Intestinal failure may benefit from sodium supplementation of 90 mmol/l or more to aid in recovery.
8. True or False: Muscle glycogen is the primary fuel source for muscle contraction during short-term intense activities like sprinting.
9. True or False: Only butyrate and curcumin have epigenetic effects, while genistein does not.
10. True or False: The worldwide prevalence of obesity is approximately 13%.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the impact of malnutrition on the health of older adults, focusing on its relationship with mortality and morbidity. What are the underlying causes and potential solutions?
12. Discuss the mechanisms involved in the uptake of non-esterified fatty acids by cells, including the roles of diffusion, carrier-mediated transport, and associated proteins.
