

Multiple Choice (10 marks)

1. Many virus infections result in immune pathology, this is caused predominantly by which of the following?
 - (a) A cytokine storm
 - (b) Antibody mediated reactions
 - (c) A response of killer T cells (CD-8)
 - (d) A decline in function of the immune system
2. Which of the following is the point at which an impulse is transmitted from one neuron to another neuron?
 - (a) Dendrite
 - (b) Glial cell
 - (c) Nerve center
 - (d) Synapse
3. Which of the following is a structural, fibrous protein found in the dermis?
 - (a) Collagen
 - (b) Heparin
 - (c) Lipocyte
 - (d) Melanin
4. Why are parvoviruses a highly impactful parasite?
 - (a) Because they have no nucleic acid
 - (b) They require a helper virus
 - (c) Only replicate in dividing cells
 - (d) Can integrate into host chromosomes
5. AIDS activism in the U.S. resulted in:
 - (a) Food and Drug Administration reforms
 - (b) Easier access to investigational drugs
 - (c) Changes in the way medicine was practiced in the U.S.
 - (d) All of the above

True / False (10 marks)

Answer True or False

6. True or False: The muscles of the soft palate are innervated by branches of the facial and glossopharyngeal nerves.
7. True or False: Chemotherapy is an effective method for controlling herpes infections in patients.
8. True or False: Reliability indicates whether a measure has been previously used in research studies.
9. True or False: A dished face profile is associated with a recessive maxilla due to failure of elongation of the cranial base.
10. True or False: Many pessimists tend to have shorter lifespans, which may contribute to higher levels of optimism in older adults.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the unique structural features of the adenovirus virion, focusing on the significance of its icosahedral shape and slender fibers in relation to its function and pathogenicity.
12. Discuss the key factors that contribute to the spread and infection of viruses, emphasizing the role of travel in disease transmission and public health implications.
