

Multiple Choice

1. **Answer:** B
Options: A) 5; B) 10; C) 2; D) 12
Note: Correct option: B - 10
2. **Answer:** D
Options: A) 0; B) 1; C) 2; D) 3
Note: Correct option: D - 3
3. **Answer:** C
Options: A) 252; B) 4680; C) 98770; D) 101170
Note: Correct option: C - 98770
4. **Answer:** C
Options: A) $\frac{125}{2916}$; B) $\frac{5}{16}$; C) $\frac{5}{54}$; D) $\frac{5}{55}$
Note: Correct option: C - $\frac{5}{54}$
5. **Answer:** D
Options: A) 458; B) 463; C) 547; D) 559
Note: Correct option: D - 559

True / False

6. **Answer:** False
Options: A) True; B) False
Note: LLM-generated false statement. Correct answer: 'one hundred seventy-nine thousand nine hundred twelve'.
7. **Answer:** True
Options: A) True; B) False
Note: LLM-generated true statement based on MCQ.
8. **Answer:** True
Options: A) True; B) False
Note: Matches the MMLU answer key.
9. **Answer:** False
Options: A) True; B) False
Note: Actual answer is '-1'.
10. **Answer:** True
Options: A) True; B) False
Note: LLM-generated true statement based on MCQ.

Long Form Response

11. **Answer:** Note that the numbers increase by 3 each time. Hence we increase by 3 a total of $\frac{32-(-4)}{3} = 12$ times. But then there must be $12 + 1 = 13$ numbers, since we need to also include the first number on the list.

Note: Students should show all steps in their mathematical solution.

12. **Answer:** E. Explain why this is the correct answer and provide supporting evidence. Show the calculation or reasoning that leads to this conclusion.

Note: Long-form derived from MCQ; award credit for stating the correct idea and giving supporting reasoning.
