 - (a) 67
 - (b) 43
 - (c) 57
 - (d) 37

True / False (10 marks)

Answer True or False

6. True or False: The expression $(2 + 5)^2 - 42$ simplifies to 7.
7. True or False: All hexagons are polygons because they only have 4 sides.
8. True or False: The average number of square miles per county in Georgia is approximately 365 square miles.
9. True or False: The sum of the constants a, d, and e in the expression $-2x^2 - 20x - 53$, when rewritten, is -80.
10. True or False: The expression 9×80 is equal to 720.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Calculate the expected number of times Bob will roll a fair six-sided die each morning in a non-leap year, considering the outcomes that affect his choices in breakfast.
12. In two games involving a fair coin, one requires 45%-55% heads to win, while the other requires over 80% heads. Discuss whether you would prefer to flip the coin 30 or 300 times for each game, providing reasons for your choices.
