  - (d) none of the above

## True / False (10 marks)

*Answer True or False*

6. True or False: Arguing that someone cannot perform a good act due to their nature exemplifies the straw man fallacy by misrepresenting their capabilities.
7. True or False: Berkeley asserts that existing and perceiving are one and the same thing, emphasizing their essential interconnection.
8. True or False: Women who feel obligated to have sex are not affected by their partners' influence over their autonomy or decision-making.
9. True or False: Singer's principle of equality prescribes how we should treat humans with equal consideration.
10. True or False: Baron argues that all artificial thought experiments, including ticking bomb cases, lack any philosophical significance.

## Long Form Response (20 marks)

*Answer each question with a clear and complete explanation.*

11. Discuss how Velleman's perspective on valuing a patient's autonomy through maximizing effective options emphasizes the importance of informed decision-making in healthcare.
12. Discuss how the "war" metaphor in government drug policies obscures the rights of drug users, and analyze its implications for philosophical discussions on justice and autonomy.
