True / False (10 marks)

Answer True or False

6. True or False: "Ad lazarum" is a form of hasty generalization that draws broad conclusions from limited evidence.
7. True or False: Some argue that animals are capable of rational thought, similar to humans, which diminishes the justification for meat-eating.
8. True or False: The largest network of Confucian shrines in the world is located in Korea.
9. True or False: In Hindu traditions, the term 'fearful' is often associated with women, reflecting societal perceptions of gender roles.
10. True or False: Altman argues that justifications of speech codes focusing on causal harm are most likely to succeed.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Construct a complete truth table for the argument consisting of the premises $\sim S \supset T$, $\sim S \supset U$, and $\sim T \supset U$, and assess its validity. If the argument is invalid, provide a counterexample and discuss its implications.
12. Discuss the implications of committing the fallacy of extension in arguments, particularly when criticizing something for failing to meet expectations it was never intended to fulfill.
