

Multiple Choice (10 marks)

1. You would use the Solomon four-group design in order to:
 - (a) improve external validity.
 - (b) evaluate the impact of pretesting.
 - (c) eliminate carryover effects.
 - (d) increase the sample size.
 - (e) control for confounding variables.
2. What are the two principal explanations for the limited capacity of short-term memory?
 - (a) Rehearsal and Forgetting
 - (b) Sensory Input and Cognitive Load
 - (c) Interference and Time-Decay
 - (d) Capacity and Duration
 - (e) Chunking and Associative Learning
3. Which of the following has the highest predictive validity in personnel selection in industry
 - (a) A projective technique
 - (b) A skills test
 - (c) A reference check
 - (d) A job sample test
 - (e) An objective personality inventory
4. Learned helplessness is an example of the power of
 - (a) cognitive dissonance
 - (b) positive reinforcement
 - (c) classical conditioning
 - (d) intrinsic motivation
 - (e) observational learning
5. Life span developmental theories, such as Baltes's Selective Optimization with Compensation theory,
 - (a) Focus solely on the influence of early childhood experiences
 - (b) Focus mainly on the development of psychopathology over time

- (c) Suggest that development is a linear process without any decline
- (d) All of the above
- (e) Are mainly concerned with cognitive development

True / False (10 marks)

Answer True or False

- 6. True or False: Aggression and passive resistance are common outcomes of avoidance-avoidance conflicts in decision-making scenarios.
- 7. True or False: Aggressive acts cannot solely be predicted by physical characteristics, as multiple factors influence aggression.
- 8. True or False: The reticular formation and reticular activating system do not play a role in the decussation of auditory stimuli.
- 9. True or False: Humanistic psychotherapy posits that psychopathology arises from blocked potential and the inability to self-actualize.
- 10. True or False: The Mood Disorder Questionnaire is widely recognized as an effective tool for assessing suicide risk.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Analyze how the emotional content of verbal materials impacts their effectiveness in the learning process, incorporating relevant psychological theories and research findings.
- 12. Analyze the waist measurements of six randomly selected chocolate rabbits (3, 2, 3.7, 5, 2.7, 3 inches) and discuss the implications of the observed positive skewness in the data.
