True / False (10 marks)

Answer True or False

- 6. True or False: In the United States, it is common for schools to hold parents accountable for their children's academic failures in a similar manner as in Japan.
- 7. True or False: Pascale would be best classified as a social psychologist, as they study group dynamics and social interactions among children.
- 8. True or False: Validity in test construction primarily assesses the diversity of question types included in the test.
- 9. True or False: Children's perception of letters is largely influenced by sound, taste, and smell during their development.
- 10. True or False: Children develop internal representational systems primarily during the concrete operational stage of Piaget's cognitive development.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the implications of the serial position effect on memory retention, using Dan's experience with a list of vocabulary words as a case study. What outcomes would you expect after two days?
- 12. Discuss the theories that propose aggression as a necessary aspect of human behavior, analyzing the implications of each theory on our understanding of aggression in psychology.
