True / False (10 marks)

Answer True or False

6. True or False: In Pavlov's experiments, the meat powder served as an unconditioned stimulus that elicited a natural response from the dog.
7. True or False: Sour grapes rationalization occurs when individuals disparage what they cannot attain as a defense mechanism to cope with disappointment.
8. True or False: Some intelligence researchers advocate for schools to prioritize collaborative learning environments over traditional teaching methods.
9. True or False: Intermittent reinforcement of the conditioned response occurs when the unconditioned stimulus is presented inconsistently with the conditioned stimulus.
10. True or False: According to Kubler-Ross, a common initial reaction of a terminally ill patient is disbelief, often expressed as 'No, it's not possible!'

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the phenomenon of separation anxiety in six-month-old children, analyzing its significance in attachment theory and its implications for child development.
12. Discuss how Carl Rogers would interpret the emotional response of Peter's parents to his decision to pursue a career in art, considering their expectations and self-structure.
