True / False (10 marks)

Answer True or False

6. True or False: Pascale's focus on children's learning strategies would classify her as a developmental psychologist.
7. True or False: Most children will typically develop the ability to clap their hands before mastering more complex skills like tying their shoes.
8. True or False: Neurotransmitters remain active indefinitely, continuously influencing receptor sites without degradation.
9. True or False: During preschool and middle childhood, children perceive letters primarily through motion, stability, and orientation.
10. True or False: At birth, the visual system is the least developed part of the brain.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the concept of "catharsis" in psychoanalytic theory and analyze how behaviorists might interpret this phenomenon in terms of anxiety redirection through therapeutic influences.
12. Discuss the concept of double-bind messages in psychology, using the example of a brother's statement to his sister about borrowing a car. Analyze the implications of such communication.
