 - (a) Direct teaching, Punishment, and Extrinsic motivation
 - (b) Cognitive dissonance, Role-playing, and Observational learning
 - (c) Trial and error, Social comparison, and Imitation
 - (d) Exposure, Reinforcement, and Social learning
 - (e) Positive reinforcement, Direct teaching, and Emotional conditioning
2. As psychologists began to study the effects of mass communication, they saw the need to distinguish between education and propaganda. Is there a distinction, and if so, what is it?
 - (a) The distinction is dependent on which view you choose to take
 - (b) Propaganda disseminates false information, while education provides only true information
 - (c) Education is designed for individual learning, while propaganda targets groups
 - (d) Propaganda is always biased
 - (e) Propaganda is a form of education that focuses on cultural knowledge
3. The position on the basilar membrane at which waves reach their peak depends on the frequency of a tone, according to which theory?
 - (a) frequency theory
 - (b) dual-process theory
 - (c) specificity theory
 - (d) trichromatic
 - (e) gestalt theory
4. Discuss the three attributes of color. Why do red and pink appear to be different colors?
 - (a) Saturation, tone, and pigment
 - (b) Intensity, shade, and tone
 - (c) Chroma, contrast, and clarity
 - (d) Brightness, shade, and chroma
 - (e) Hue, brightness and saturation

5. The Intelligence Quotient is defined as the
- (a) chronological age/verbal score $\times 100$
 - (b) mental age/performance score $\times 100$
 - (c) chronological age/performance score $\times 100$
 - (d) verbal score/chronological age $\times 100$
 - (e) verbal score/performance score $\times 100$

True / False (10 marks)

Answer True or False

- 6. True or False: Both retinal and cochlear receptors possess the same magnitude of resting potentials due to their similar cellular structures.
- 7. True or False: A person with Wernicke's aphasia typically exhibits fluent but unintelligible speech, lacking meaningful content.
- 8. True or False: Arriving on time for work is primarily a culturally-based attribute rather than a psychological necessity.
- 9. True or False: A genotype can directly impact fetal development in the same way that a teratogen does.
- 10. True or False: Implementing a quota system in all sectors of society is an effective method for reducing prejudice.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the role of heredity in shaping personality as suggested by twin studies, considering the extent to which the environment may also influence personality development.
- 12. Discuss the components of Needs Analysis in training programs, and critically evaluate why organizational analysis is not considered part of this process.
