

Multiple Choice (10 marks)

1. The notion that there are three major life tasks - friendship, occupation, and love - is MOST consistent with the philosophy of:
 - (a) Perls.
 - (b) Maslow.
 - (c) Erikson.
 - (d) Piaget.
 - (e) Rogers.
2. Nearsightedness results from
 - (a) too little curvature of the cornea and lens
 - (b) too much curvature of the retina and lens
 - (c) too much curvature of the cornea and lens
 - (d) too much curvature of the iris and cornea
 - (e) incorrect alignment of the cornea and retina
3. Quasi-experimental designs are distinguished from true experimental designs on the basis of whether there is
 - (a) implementation of the intervention by the researcher
 - (b) pre-determined assignment of participants to groups
 - (c) use of a non-comparison group
 - (d) use of multiple measures of outcome
 - (e) use of a single group of participants
4. Identify the only construct that is not pertinent to developmental models on intelligence:
 - (a) Triarchic theory of intelligence
 - (b) Multiple intelligences theory
 - (c) Cognitive development theory
 - (d) The positive manifold
 - (e) G theory
5. Neural transmission is often described as an electrochemical process. Which of the following is most directly involved in the electrical aspect?

- (a) cell body
- (b) myelin
- (c) synaptic vesicles
- (d) glial cells
- (e) terminal buttons

True / False (10 marks)

Answer True or False

6. True or False: The neurotic does not discard symptoms that fail to relieve anxiety, often continuing to rely on them.
7. True or False: Damage to the amygdala can impair emotional recognition, which may explain Lucille's inability to recognize her family.
8. True or False: Lack of exercise is a critical factor in Type A behavior that is associated with an increased risk of heart disease.
9. True or False: According to Erikson, a young adult's developmental crisis centers around autonomy vs. shame and guilt.
10. True or False: Cognitive dissonance arises only when an individual experiences negative outcomes from their choices.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the behavioral alternatives an organism has in a conflict situation according to Neal Miller, focusing on the influence of goal proximity and the strengths of approach and avoidance drives.
12. Discuss how the projective hypothesis relates social functioning to psychological functioning, and analyze its implications for understanding human behavior in a psychological context.
