

Multiple Choice (10 marks)

1. According to Jellinek(1952) what progression does the life of an alcoholic usually follow?
 - (a) Onset phase, abuse phase, dependency phase, abstinence phase
 - (b) Prealcoholic phase, alcoholic phase, recovery phase, relapse phase
 - (c) Initial phase, adaptive phase, dependent phase, deteriorative phase
 - (d) Experimental phase, social use phase, intensive use phase, compulsive use phase
 - (e) Initial phase, middle phase, crucial phase, termination phase
2. The classic aging pattern is defined as 2 decline on which subtest(s) of the Wechsler Adult Intelligence Scale-Revised
 - (a) Arithmetic and Digit Span subtests
 - (b) All subtests except Block Design
 - (c) Similarities and Picture Completion subtests
 - (d) Vocabulary subtest only
 - (e) All Performance subtests
3. Discuss the relationship between arousal and motivation.
 - (a) Motivation can exist without any form of arousal.
 - (b) Arousal level is a central aspect of motivation.
 - (c) Motivation is the cause of arousal.
 - (d) Motivation is a by-product of arousal.
 - (e) High arousal always maximizes motivation.
4. The denominator term in the F-ratio is reduced in magnitude by:
 - (a) decreasing both within-group and between-group variability.
 - (b) increasing both within-group and between-group variability.
 - (c) increasing between-group variability only.
 - (d) increasing within-group variability.
 - (e) decreasing between-group variability only.
5. "According to the elaboration likelihood model, a person is most likely to rely on the "central route" for processing information when:"
 - (a) "the message is within his "latitude of acceptance.""

- (b) he is in a neutral or slightly negative mood.
- (c) the message is outside his "latitude of acceptance."
- (d) everyone else in the group disagrees with the message.
- (e) everyone else in the group agrees with the message.

True / False (10 marks)

Answer True or False

- 6. True or False: Behavioral therapy often focuses on promoting clients' insight into their dreams and unconscious mind.
- 7. True or False: An animal is less likely to associate a conditioned stimulus (CS) with an unconditioned stimulus (UCS) if the delay between them is too long.
- 8. True or False: Erikson's stage of autonomy vs. shame and doubt corresponds to Freud's phallic stage of psychosocial development.
- 9. True or False: Fundamental attribution bias leads individuals to overemphasize personality traits while underestimating situational factors in others' behavior.
- 10. True or False: Multiple-choice questions are often definitional rather than conceptual, making them easier to answer for many students.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the research findings on gender differences in conversation styles, particularly focusing on how women's tendency to ask more questions influences communication dynamics.
- 12. Analyze Murray's theory of motivation and evaluate its impact on McClelland's Achievement Motivation model, focusing on the interplay of individual needs and behavior.
