

Multiple Choice (10 marks)

1. Describe the theory of Stern (1956) in the nature-nurture controversy.
 - (a) "Genetic blueprint" hypothesis
 - (b) "Innate potential" hypothesis
 - (c) Environmental impact hypothesis
 - (d) "Experience-driven" development theory
 - (e) "Blank slate" hypothesis
2. Operant extinction would NOT be the treatment-of-choice when:
 - (a) the behavior has been reinforced on a continuous schedule.
 - (b) the behavior is not causing significant distress or dysfunction.
 - (c) the behavior is a part of the individual's cultural or religious practices.
 - (d) an alternative behavior cannot be identified.
 - (e) a temporary increase in the behavior cannot be tolerated.
3. A family had eight children. The ages were 9, 11, 8, 15, 14, 12, 17, 14. (a) Find the measures of central tendency for the data. (b) Find the range of the data.
 - (a) Mean: 14 years, Median: 12.5, Mode: 13, Range: 8
 - (b) Mean: 13 years, Median: 14, Mode: 12.5, Range: 17
 - (c) Mean: 13.5 years, Median: 12.5, Mode: 14, Range: 8
 - (d) Mean: 13 years, Median: 13, Mode: 8, Range: 9
 - (e) Mean: 12.5 years, Median: 12, Mode: 11, Range: 10
4. One's ability to make inferences about the behavior of a population from the behavior of a sample of that population is referred to as
 - (a) reliability
 - (b) face validity
 - (c) internal validity
 - (d) external validity
 - (e) statistical significance
5. Which of the following types of data involves counting the number of occurrences of a behavior observed during a specified time period?
 - (a) Partial-interval recording

- (b) Whole-interval recording
- (c) Duration recording
- (d) Time sampling recording
- (e) Continuous recording

True / False (10 marks)

Answer True or False

- 6. True or False: A projective technique has the highest predictive validity in personnel selection within the industry.
- 7. True or False: Pitch factors, loudness factors, and cognitive factors are the primary elements involved in sound localization.
- 8. True or False: Information from the optic nerve is initially processed in the occipital lobe of the brain.
- 9. True or False: Asian and Asian-American clients are likely to express emotional problems primarily through verbal symptoms rather than somatic symptoms.
- 10. True or False: The Whorfian hypothesis of linguistic relativity suggests that some languages are tonal while others are not due to cultural differences.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

- 11. Discuss the ethical criticisms of Milgram's obedience study, focusing specifically on the lack of debriefing and its implications for participant welfare and research integrity.
- 12. Discuss the ethical implications of waiving co-payments for low-income clients under insurance coverage while using a sliding fee scale. What considerations should guide this practice?
