

Multiple Choice (4 marks)

1. 1. _____ framework made cracking of vulnerabilities easy like point and click.
 - (a) .Net
 - (b) Metasploit
 - (c) Zeus
 - (d) Ettercap
2. _____ is a process of wireless traffic analysis that may be helpful for forensic investigations or during troubleshooting any wireless issue.
 - (a) Wireless Traffic Sniffing
 - (b) WiFi Traffic Sniffing
 - (c) Wireless Traffic Checking
 - (d) Wireless Transmission Sniffing

True / False (26 marks)

Answer True or False and justify briefly.

1. True or False: The correct answer to 'Applications developed by programming languages like _____ and _____ have this common buffer-overflow error.' is 'C, C++'.
2. True or False: The correct answer to 'When a wireless user authenticates to any AP, both of them go in the course of four-step authentication progression which is called...' is 'wireless handshaking'.
3. True or False: The correct answer to 'In MD-5 the length of the message digest is' is '128'.
4. True or False: The correct answer to 'What are the port states determined by Nmap?' is 'Open, filtered, unfiltered'.
5. True or False: The correct answer to 'Can a stream cipher have perfect secrecy?' is 'No, since the key is shorter than the message'.
6. True or False: The correct answer to 'Which of the following is not an example of presentation layer issues?' is 'Weak or non-existent authentication mechanisms'.
7. True or False: The correct answer to 'What tool can be used to perform SNMP enumeration?' is 'IP Network Browser'.

8. True or False: The correct answer to 'A session symmetric key between two parties is used' is 'Only once'.
9. True or False: The correct answer to 'Man in the middle attack can endanger the security of Diffie Hellman method if two parties are not' is 'Joined'.
10. True or False: The correct answer to 'How is IP address spoofing detected?' is 'Comparing the TTL values of the actual and spoofed addresses'.
11. True or False: The correct answer to 'Which of the following is not a block cipher operating mode?' is 'CBF'.
12. True or False: The correct answer to 'The message must be encrypted at the sender site and decrypted at the' is 'Sender Site'.
13. True or False: The correct answer to 'What does EXE do when the STP solver times out on a constraint query for a particular path?' is 'Assume that the query is not satisfiable and stop executing the path'.

Long Form Response (10 marks)

Provide thorough reasoning and reference key steps.

1. Write a function to find numbers divisible by m or n from a list of numbers using lambda function.
