

Multiple Choice (16 marks)

1. Which types of functions grow the slowest?

- (a) $O(N)$
- (b) $O(\log \log N)$
- (c) $O(N!)$
- (d) $O(\log N)$
- (e) $O(N^N)$

2. If your training loss increases with number of epochs, which of the following could be a possible i

- (a) Regularization is too high and model is underfitting
- (b) The number of epochs is too high
- (c) Step size is too small
- (d) Step size is too large
- (e) The number of epochs is too low

3. Which among the following prevents overfitting when we perform bagging?

- (a) The use of all data without sampling
- (b) The practice of validation performed on a random subset of classifiers trained
- (c) The use of underfitting to counterbalance overfitting
- (d) The use of weak classifiers
- (e) The use of classification algorithms which are prone to overfitting

4. What is the number of labelled forests on 8 vertices with 5 connected components, such that ver

- (a) 620
- (b) 520
- (c) 220
- (d) 120
- (e) 820

5. Any set of Boolean operators that is sufficient to represent all Boolean expressions is said to be c

- (a) {NAND}
- (b) {NOT, NAND}
- (c) {AND, OR}

- (d) {NOT, OR}
 - (e) {XOR, NOT}
6. Adding more basis functions in a linear model, pick the most probably option:
- (a) Decreases model bias
 - (b) Increases estimation bias
 - (c) Doesn't affect bias and variance
 - (d) Increases both bias and variance
 - (e) Decreases variance
7. Statement 1| The softmax function is commonly used in mutliclass logistic regression. Statement 2| The softmax function is commonly used in binary logistic regression.
- (a) False, False
 - (b) True, Statement 2 is not related to Statement 1
 - (c) False, Both statements are related to each other
 - (d) Statement 2 is true, but Statement 1 is irrelevant
 - (e) Statement 1 is true, but Statement 2 is irrelevant
8. Which of the following is not a security exploit?
- (a) Malware
 - (b) Keylogging
 - (c) Data breach
 - (d) Authentication
 - (e) Eavesdropping

True / False (14 marks)

Answer True or False and justify briefly.

1. True or False: The correct answer to 'In Python 3, what is ['a', 'Chemistry', 0, 1][1]?' is 'Chemistry'
2. True or False: The correct answer to 'In a Gigabit Ethernet LAN, the average size of a frame is 1500 bytes'
3. True or False: The correct answer to 'Statement 1| Highway networks were introduced after ResNet'
4. True or False: The correct answer to 'What is the number of labelled forests on 10 vertices with 5 edges'
5. True or False: The correct answer to 'Encapsulating Security Payload (ESP) belongs to which Internet Protocol'
6. True or False: The correct answer to 'Suppose a convex polygon has 26 faces and 39 edges. How many vertices does it have'
7. True or False: The correct answer to 'Statement 1| Industrial-scale neural networks are normally trained on GPUs'

Long Form Response (10 marks)

Provide thorough reasoning and reference key steps.

1. Write a function to find the sum of geometric progression series.
