True / False (10 marks)

Answer True or False

6. True or False: The Laplace transform of $f(t) = t^n$ is $n! / s^{n+1}$, which incorrectly omits a factor of s .
7. True or False: A phase shift of 30 in a phase-shift keying system ensures synchronization, resulting in a phase shift of 30.
8. True or False: The electrostatic energy of a point charge within a conducting shell is calculated using the formula $U = \frac{1}{2} \int \rho(r) \phi(r) dV$ (where $\phi(r) = 1/r$).
9. True or False: The one cycle surge current rating of an SCR with a half cycle surge current of 30A is 30A.
10. True or False: The curl of the vector field $\mathbf{a} = x^2y^2\mathbf{i} + 2xyz\mathbf{j} + z^2\mathbf{k}$ at the point (1, -2, 1) is (0, 4, 0).
