

Multiple Choice (10 marks)

1. Answering multiple-choice questions is often easier than answering fill-in or completion questions, because multiple choice questions
 - (a) are definitional rather than conceptual
 - (b) check memorization rather than critical thinking
 - (c) encourage rote learning rather than comprehension
 - (d) require less time to answer
 - (e) enhance retention of information
2. Providing education and job training to adolescents and young adults who have recently been released from a drug treatment program is an example of:
 - (a) secondary intervention.
 - (b) quaternary prevention.
 - (c) secondary prevention.
 - (d) psychological intervention.
 - (e) advanced prevention.
3. Which schedule of reinforcement is followed by Soledad, who answers every e-mail message her friend sends?
 - (a) negative reinforcement
 - (b) continuous
 - (c) positive reinforcement
 - (d) extinction
 - (e) variable interval
4. ""Vicarious liability"" is most likely to be a concern when a psychologist is acting in the role of:
 - (a) consultant.
 - (b) supervisor.
 - (c) faculty member.
 - (d) researcher.
 - (e) clinical director.
5. Antonia has a cat. The first time she sees a rabbit, she calls it a cat. Her mistake is due to the process of

- (a) association.
- (b) generalization.
- (c) recognition.
- (d) classification.
- (e) interpretation.

True / False (10 marks)

Answer True or False

6. True or False: In forced compliance situations, belief change is more significant when individuals receive a large reward for their compliance.
7. True or False: The Wechsler Adult Intelligence Scale was the first standardized measure of assessment in psychology.
8. True or False: The life of an alcoholic typically progresses through the onset phase, abuse phase, dependency phase, and abstinence phase.
9. True or False: Bandura's social learning theory posits that children's misbehaviors are influenced by their goals such as attention, revenge, or power.
10. True or False: Systematic desensitization involves confronting the actual feared object or situation directly during therapy.

Long Form Response (20 marks)

Answer each question with a clear and complete explanation.

11. Discuss the differences between motor (enactive) codes and visual or verbal codes in memory representation, providing examples to illustrate your analysis.
12. Discuss the significance of the median in understanding data distributions, using the set of numbers 5, 8, 12, 3, and 9 to illustrate your analysis.
